## EXPLANATORY NOTES

1. **Source of Data:** Export statistics are compiled from information appearing on customs export entries, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any month include all goods declared on export entries received at D.B.S. during the calendar month, and on electricity and pipeline reports received within 12 working days of the close of the calendar month. Most export entries reach D.B.S. within a week of the date the goods leave Canada, although entries for some waterborne shipments arrive much later. Electricity exports are usually included in statistics for the month in which these exports actually occurred. Pipeline exports of crude petroleum are reported too late for inclusion in statistics for the month when these exports actually occurred; they are therefore included in statistics for the following month.
3. **Coverage:**
  - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
  - b. **Re-Exports:** Statistics of re-exports include only goods previously included in import statistics which are exported from Canada in the same form as when imported. Minor operations such as sorting or re-packing are not considered as changing the condition of imported goods.

Although the definition of re-exports is the same as was used in 1963 and earlier years, commencing in January 1964 statistics of re-exports include exports from customs warehouses, which were previously excluded from this record. This parallels a change in import statistics, which from January 1964 include goods entered into customs warehouses rather than goods cleared from customs warehouses.
  - c. **Exclusions:** The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value (a small amount of gold scrap in the form of jewellers' sweepings is included in class 256-99); settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad (and goods returned from Canada by forces of our N.A.T.O. allies or by foreign diplomats); temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's N.A.T.O. allies financed under the Defence Appropriation Acts; bunker supplies and ships' stores sold to foreign vessels in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I. Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Units of number refer to the number of complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). "Ton" means 2,000 pounds avoirdupois. "Cwt." means 100 pounds avoirdupois.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars. This has resulted in some overstatement of the value of exports for the period prior to June 1961, and some understatement of their value in subsequent months.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete because of mechanical limitations. Full descriptions of all commodities and commodity groups appear in the Export Commodity Classification, Vol. I. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
